

Mind freeze  
Courtney Ross

High Concept

Hi-Tech as well as adventure will take you far places. Outside of this world and outside of your own mind. Build your own player and take it places you've never seen before.

Features

- Human characters are depicted as very slim and tall like the characters of Avatar. The player is able to choose their own skills and appearance. Every player is able to experience each skill there is available which are computer geek, explorer, militia.
- Players are able to choose between male or female characters and choose a different role for each one. Every character curated has the option of being saved in a library.
- Female character voice – overs feature Nick Minaj, Kim Kardashian, and JENNIE.
- Male character voice – overs feature Kanye west (Ironically), Elon Musk, and Rick Owen.
- Mind freeze's has transitional scenes whenever there is a change of conflict or setting with the narration of Morgan Freeman.
- The base of this game ranges from 3 categories of science; comp sci, astrology, and environmental. Mainly comp sci.
- Life on earth is 1000 years into the future after "the end". With only dreamy forest, mutant animals, and secured camps left.
- A non-metal space station is the largest ever seen sitting at 450 feet. With 8 bedrooms to choose from. Also, you can adventure off into the multiple control, habitat, gym, cafeteria, and viewing rooms.
- The game tracks your skillset as it progresses through challenges and play. After each challenge or play you are rewarded with weapons and VC (virtual currency). VC is used for any in app purchases available including upgrades of any sort.
- All characters have access to any level of weaponry available based on their skillset. Because of this, the player can switch between any character in the game based on challenge or play in comparison to NBA 2k.
- Tech characters or hackers have access to militia grade technology that they can build from scratch. Which allows players to curate innovative tactics for survival on the new planet.
- It is an ice giant planet. Supposedly inhabitable to all creatures. Once reached, without any harm sufficed to you, your allowed to explore this large planet with the highly advanced technology you were put to the challenge to build.
- This game tries it's best to replicate the new planet's atmosphere and environment as much as possible. Which means, this game will feature multiple obstacles like extremely dangerous gust of freezing cold gaseous winds, the ability to walk straight, and ordinary creatures.
- Mind Freeze has a realistic art-style that aims to capture the beautiful essence of what's left of Earth, the details of space, and pure emptiness of the new world due to the partnership with NASA offering live photos and videos of these settings which gives the players a chance to see textures of foreign and known objects also capability to notice environments.
- Characters who wish to explore the planet must use VR technology to withstand these unlivable conditions of the planet without being internally and externally harmed. Mimicking the usage of VR in a show called Black Mirror, characters transfer their consciousness using the VR headset.
- Includes a fabulous scene through your characters' eyes putting the VR device on their head and watching as their mind gets transferred in tunnel vision and visuals like holographic representation mimicking hallucinogenic effects.

- Mind Freeze luckily features multiplayer so players are capable of completing challenges and goals quicker and easier. Also gives all players the chance to experience the story line and explore what the new world has to offer through gameplay together.

## Overview

### Target hardware

Available for purchase in PlayStation and Xbox stores. Limited time only, Free with pre-order of the Apple Vision Pro headset releasing next year.

### Player motivation

Earth endured a serious tragedy causing all human life to go extinct except for the highest of power and intelligence. It is the players job to survive what's left on Earth and travel out of space through different roles. There they will train, gear up, and search for a secure planet and restore humanity.

### Target audience

Mind freeze is a game targeted towards ages 13 - 50, any gender, and easily accessible for the disabled. Players who are interested in playing Mind freeze tends to also play Assassin's Creed, COD, and Watchdogs.

### Genre

The genre of Mind Freeze is action-adventure and sci-fi.

### Competition

There is 0 competition.

### USP

- Stunning visuals and effects
- Realistic physics and objects
- User – generated content
- Immersive storytelling
- VR ability

### Design goals

- Realism: Mind Freeze aims to help the player escape reality. To do so, we must somehow make the player forget real life. We plan on doing this through using a Freytag developed storyline, great visual effects to mimic the real-world science/environment as closely as possible, and a synopsis into the game's suspension of disbelief.
- Innovation: Because the game advocates towards realism. This would include ways for the player to experience some real-world brain stimulating challenges. The goal is that for every time the player turns off the game, the player becomes increasingly innovative with technology and gameplay. This goal would be accomplished by the use of our highly super - skilled characters that are available based on the skill level needed. Obstacles like building advanced devices, new livable spaces, and fighting against the habitable creatures of the new planet will help the player be able to think and properly execute the instructions, maps, or tasks.
- Fun and enjoyment: At the end of the day, Mind Freeze is striving towards replay ability. Something that will drive the characters to need to come back and play. Discovering ways players can experience fun and enjoyment then delivering it is a great way of achieving that drive.

## Further details

### Characters

**Militia team:** All players are capable of curating and choosing their own characters for every team. The militia team are the characters that makes the tasks and orders. They're all fit and demanding but also compassionate.

**Computer geeks:** Being that the time frame of Mind Freeze is placed 1000 years in the future, technology was able to become extremely advance because of a team of very intelligent computer scientist. When a tasks, challenge, or obstacle appears that needs a computer geek the player is able to choose between any character with the skill set of getting the job done. With their special intelligence they are able to invent new objects for survival on the new discovered planet.

**Explorers:** This is an action – adventure. Meaning an explorer is necessary. Someone who is brave, intelligent, and adventures. The team that leads the way through foreign lands providing the survival tactics and strategies. Clothing mimics the characters of the Film Jumanji.

### Pitch

1. The only humans that were left form Earth made it possible to colonize another planet after the devastation on Earth with highly advanced military grade technology using all computer science data. Your job is to terraform the habit of the new world to restore humanity.
2. If computer science and engineering is your forte this is the game for you as you learn to become more innovative to survive using the best technology, we have to offer. The human race depends on you and your team to find a new planet and make it habitable. For ages 13 – 50, find your team and adventure out to conquer the new world.
